A skier wearing a bright red jacket, a grey helmet, and blue-tinted goggles is captured in a dynamic pose, carving through deep, powdery snow. The skier's body is angled towards the right, with their left arm extended back and their right arm forward, holding ski poles. A large, billowing cloud of snow is kicked up behind the skier, partially obscuring the background. The background consists of snow-laden evergreen trees, their branches heavily coated in white snow. The overall scene conveys a sense of speed and winter sports.

A full-page photograph of a skier in a dynamic pose, leaning into a turn on a snowy mountain slope. The skier is wearing a bright red jacket, white pants, a black helmet, and goggles. They are holding red ski poles and wearing red and white ski boots. The background is a clear, deep blue sky. The text "INNOVATION THROUGH STRATEGIC PARTNERSHIPS" is overlaid in white, uppercase letters across the middle of the image.

INNOVATION THROUGH STRATEGIC PARTNERSHIPS

## STRATEGIC PARTNERSHIPS

---

GORE-TEX® is the ideal solution for all kinds of winter sports; it's durably waterproof, windproof, and highly breathable. You stay warmer when it's cold and drier when you perspire. GORE-TEX® boasts a "Guaranteed to Keep You Dry" promise.

GORE-TEX INFINIUM™ is designed to support even more moments in your active life. Made for when comfort and performance are a priority, this innovative technology offers an upgrade on your current gear. Made for flexibility, functionality, and style for life's adventures, you can now explore more, say yes more, and take every day further.

Pow Pow is the only 4-way stretch fabric from GORE-TEX® on the market. It is exclusive to Spyder and spread throughout our top performance styles.

Avra™'s ultra-thin polyester fibers are extruded and held together by a proprietary removable polymer. These bicomponent fibers can be knit or woven into fabrics on conventional equipment. Once the fabric is made, our removable polymer washes away in hot water, resulting in ribbon-like fibers that are smaller than traditional polyester fibers. The result is a distinctly silky fabric that keeps you drier and more comfortable than ever before.

PrimaLoft® insulation's silky softness, high loft and incredible warmth mimics goose down, but it's engineered with proprietary finish technology to deliver permanent water resistance. PrimaLoft insulation uses fibers just a fraction the diameter of a human hair to form a tight collection of air pockets that trap heat from your body and keep the cold out, providing an excellent warmth-to-weight ratio.

D3O® materials are made using a combination of advanced polymer chemistry and cutting-edge design. The materials are soft and flexible, with no compromise on comfort, but react differently when force is applied. D3O® absorbs and dissipates energy during an impact, reducing the amount of force transmitted to your body compared to standard foams.

REPREVE® – Transforming recycled materials (including plastic bottles), Repreve provides sustainable solutions to brands dedicated to fighting climate change. Compared to making what’s called virgin fiber, using REPREVE® offsets using new petroleum, emitting fewer greenhouse gases and conserving water and energy in the process. That makes a big difference for our future and our industry.

Down is nature’s perfect insulator. Its tiny fibers are lightweight, compressible, and efficiently hold body heat. Down is rated in “power fill.” The higher the number, the greater the quality. The greater the quality, the better the warmth.

X-STATIC® is made by permanently bonding 99.9% metallic silver to the surface of a fiber. It is not a nanotechnology or a complex chemical formula, just silver. The permanent performance of X-STATIC® keeps apparel smelling fresher for longer, even after multiple wear cycles between washings.

Synthetic Down is a 100% Polyester insulation fill that is as lightweight as natural down, is highly breathable and extremely warm... even when wet.

# GOLD, SILVER, BRONZE

## TECHNOLOGY & INNOVATION HIERARCHY

Providing consumers with unmatched innovation at every level is an advantage only Spyder can deliver. Our innovation partners allow Spyder to expand beyond the hyper focused reality of our competitors, and offer distinctive design, next level innovation and premium quality for all consumers.

Our Gold, Silver, and Bronze product tiering strategy allows consumers to get the quality they desire without sacrificing the performance they demand.

### *Gold*

*It does not get any better than this.*

Our *Gold Level* products manifest the highest level of performance, not just from Spyder, but across the entire industry. True elevation and innovation where it matters, for the people it matters to, Spyder's *Gold Level* stands at the top.

### *Silver*

*Setting the benchmark for accessible innovation.*

Spyder's *Silver Level* represents an outstanding degree of performance and value that elevates beyond what many need, but is exactly what most want. There is nothing middle of the road about the *Silver Level* from Spyder.

### *Bronze*

*Where other brands top-off, Spyder begins to elevate.*

The *Bronze Level* from Spyder represents a product category that combines exceptional capability and value derived from our 40 years of technical innovation. Spyder's *Bronze Level* is the new baseline for performance.
